## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## **DETAILED ACTION**

### ***Election/Restrictions***

1. The election of species requirement of 22 August 2003 is withdrawn in favor of the following election of species requirement which is considered to more clearly define the species as disclosed in the specification and drawings.
2. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Figs. 1-8C

II. Figs. 9-10A

III. Figs. 11 and 12

IV. Fig. 13

V. Fig 15

VI. Figs. 16-24

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 3727

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### ***Examiner Comments***

5. It is noted that the election of species requirement above is made in light of the following. In the Brief Description of the Drawings, the terms “thereof” and “therewith” are unclear with respect to what is being disclosed. These terms render the specification unclear with respect to what features of the invention are being disclosed as usable together and which are not. Appropriate rejection/objection will be made upon examination on the merits.

Art Unit: 3727

6. Note is made that fig. 14 appears to be showing a feature of the invention which is usable with any of the embodiments where a hole is used as a secondary or primary tool holder (page 14, first paragraph of the spec.). As such, it has not been included with any particular Group above, but will be examined with the elected species.

7. Also, it is noted that drawing figures 11-13 appear to be showing a one-piece holder as opposed to the other embodiments where a front and back portion are formed separately and then attached. As such, the statement on page 13, lines 13 and 14 that the back support member in fig. 11 is the same as in the embodiment in fig. 1 is unclear and contradictory to what is shown in the drawings. Appropriate rejection/objection will be made upon examination on the merits.
